

Quality & Compliance Services

How many hours will your lab spend on validation this year?

Lab validation is increasingly complex and time-consuming. You need to:

- Improve patient result quality through risk reduction
- Ensure compliance with regulations, norms and standards
- Acquire skills and tools to make validation easier
- Gain more time to concentrate on your objectives

Your shortcut to complete lab validation

To help you through the validation maze and lighten your workload, we offer a **personalized validation solution**.

Together, we will develop your lab's validation/verification strategy by taking into account your immediate validation goals, ensuring your process is **easy to maintain** and building in a notion of **long-term validation leverages**. In your lab context, we can help you:

- **Set-up** tailor-made validation procedures
- **Qualify** systems and validate reagents
- **Document** your validation process and set-up sustainable documentation streams
- **Implement** statistical tools to automate calculation and make validation easier
- **Train** your technicians to validate systems

Validation Solutions

A complete validation service tailored to your needs

Qualification of System Selection

- System requirements
 - Supplier data
 - Supplier contract
- System documentation

Risk Analysis

- Identification of impacting factors
- Risk assessment
- Proposal for risk control & management

Installation Qualification

- Validation of integration and installation for optimal laboratory workflow

Operational Qualification

- On-site verification of system functioning
- Verification of IT functions

Performance Qualification

- Bibliography and scientific documentation
- Protocol delivery for method verification
- Dedicated software for method verification

Validation/Verification Report Writing

- Presentation of data and results

User Coaching

- Personalized evaluation of training needs
- Demonstration of appropriate use of Instrument, User and Maintenance Manuals

EN ISO 15189 (section 5.5) and EN ISO 17025 compliance made easy

Simplify your daily workload with our step-by-step method validation package, specifically designed to rapidly and successfully validate instruments for routine use in your setting.

**Time is one of your greatest resources –
make smart use of it.**

We will help you get successfully through the validation maze, so you have more time to concentrate on achieving your goals.
